A JavaScript Developer with 3+ years of experience, adept at transforming designs into reusable functional components and working with modern web technologies. Proficient in React.js for building dynamic user interfaces and Node.js for developing scalable server-side applications. With a solid foundation in HTML, CSS, and TypeScript, I have successfully tackled web applications with intricate UIs and features. Eager to enhance my skills with emerging technologies as needed.

Experience

Software Engineer *(Full - Time)*   *Wald AI | Bangalore | Aug 2024 - present*

- Developing an secure LLM chat application...
- Incorporated an LLM agent into the chat, enabling web searches, file generation, and graph creation within the chat interface.
- Implemented RAG functionality, allowing users to upload various documents and engage in discussions based on those documents.
- Addressed significant bugs and made improvements in the application, such as data sanitization, reinsertion, and code highlighting within the chat.
- Created an admin dashboard for managing and monitoring application usage within their organization.

Frontend Developer *(Full - Time)*   *KAOS | Bangalore | Apr 2022 - Aug 2024*

- Engaged in frontend development for a Cloud-based application utilized for TV program scheduling with a global customer base.
- Designed the UI for numerous captivating features of the application, guaranteeing their effective integration and operation.
- Played a role in creating and upkeeping the design system library to maintain uniformity and effectiveness in UI elements throughout the application.
- Implemented unit tests for both new and current features to aid in identifying potential bugs during feature development.
- Resolved multiple production bugs in existing features, enhancing the application's overall reliability and security.

Software Engineer *(Internship)*   *Roxiler Systems | Pune | Jan 2022- Apr 2022*

- Developed a social media app tailored for senior citizens, offering features such as post creation, reading, adding friends, and following.
- Enhanced the app's performance by addressing critical bugs, leading to overall improvement.
